

TEAM JILAPI

Introduction:-

Company X, a rising contender in Bangladesh's dynamic supermarket industry is facing challenges like high costs, inefficiencies and limited reach. It must redefine its brand, streamline operations & expand strategically to secure a strong market position in Bangladesh.

Problem Identification:-

1. **High costs** discourage price-sensitive customers.
2. **Long queues** frustrate customers.
3. **Overcrowding and misplaced products** ruin experiences.
4. **Fixed prices** alienate budget-conscious buyers.
5. **Limited reach and crisis** unpreparedness hinder expansion.

Big Idea:-

Redefining supermarkets: Affordable, efficient, and scalable Company X, where technology meets customer satisfaction to lead the future of retail in Bangladesh.

Action Plan:-

“Build Strong Brand Identity”

1. **Affordable and Modern Company X**

Weekly Deals: Discounts on essentials (like rice, oil, fruits, vegetables, meats) to break the “expensive” stereotype.

Loyalty Rewards: A fun point-based program- [shop more](#) and [save more](#).

2. **Enhancing Shopping Experience**

Smart App: Locate products, navigate aisles and enjoy mobile checkout [hassle-free](#).

Organized Aisles: Simplified layouts for quicker shopping.

3. Memorable Campaigns

Inclusive Marketing: Partner with influencers to show supermarkets are for everyone.

Supply chain strategy

1. Planning and Analysis :-

- Negotiating supply and demand.
- Minimizing operating costs.
- Streamlining operations.

2. Sourcing (procurement) :-

- Choose the right vendor offering the ideal price.
- Select an incompetent supplier.
- Ensure suitable quality raw materials are procured at cost effective rates.

3. Inventory :-

- Having several suppliers to secure enough raw materials.
- list has to be regularly updated or demarcate available stock and required stock.

4. Production and Transportation :-

- **Implement a hub-and-spoke system:** Establish regional hubs (e.g., in divisional cities) to serve outlets in surrounding areas.
- Use technology like GPS tracking to monitor deliveries and optimize routes.

5. Return of goods :-

- Return of faulty/malfunctioning goods and make refunds.
- Identify faulty product issues and coordinate the actions necessary to remediate them.

Resilient crisis management plan

• Risk Assessment :-

Understanding the specific natural disasters and develop a crisis control's software .

• Clear communication channels :-

Develop an Emergency notification system (ENS) which ensures crucial messages reach the right individuals at right time.

• Defined Roles and Responsibilities :-

Establishing a dedicated crisis management team, with clearly defined roles and responsibilities.

- **Resource Allocation :-**

The necessary resources must be readily available, including emergency supplies and equipment's.

- **Uses technology for Crisis Management :-**

1. Automated Alerts and Notifications : Swift and precise
2. Geospatial intelligence : Real-Time insights for informed decisions
3. Data integration and Analysis : A unified view for effective response

Competitor	Strengths	Weaknesses	Opportunity for Company X
Shwapno	Wide network, health focus	Perceived as mid-high priced	Focus on affordability and inclusivity
Meena Bazar	Farmer collaborations, e-commerce	Limited outlets	Leverage regional sourcing and delivery
Unimart	Premium Experience	High pricing, limited reach	Position as value-for-money alternative
Daily Shopping	Affordability, Accessibility	Limited tech integration	Add technology to enhance efficiency

Feasibility

1. Financial Feasibility

Discounts and loyalty programs will drive foot traffic and foster customer loyalty.

Initial costs for a **smart app** will be offset by reduced operational overhead and improved customer experience.

2. Operational Feasibility

Organized aisles and **mobile app** navigation will streamline shopping, increasing satisfaction.

Regional hubs and **GPS tracking** will reduce transportation costs and improve delivery efficiency.

3. Technological Feasibility

Automated alerts and real-time data integration will enable swift response during crises, ensuring business continuity.

GPS and data systems will **optimize stock** management and delivery routes.

4. Market Feasibility

Affordable pricing, **influencer partnerships**, and loyalty programs will attract a broad customer base.

Mobile checkout and efficient aisles will enhance the overall shopping experience.
